

GENERAL:

The ST206 Cable Tracker can scan line, test line, voltage polarity detection, test line short/open and test LAN cable wiring. It is an assistance of line installation and maintenance engineer. This product is applied to the communication lines and ordinary family wiring. It can improve the wiring efficiency of engineer and also can improve the line working progress. There is Tone Generator and Tone Probe included in the kit.

FEATURES:

- ▶ Scan line function: ST206 can quickly find the needed line among many disordered lines.
- ▶ Test cable type: network cable, twisted pair cable, telephone line, USB cable, coaxial cable.
- ▶ When switchboard is with weak electricity, ST206 can also check the line.
- ▶ Test line function: easy to accurately test the RJ45 line sequence.
- ▶ You can use earphone to scan line under noisy environment.
- ▶ Flashlight function on receiver is convenient to scan in the dark environment.
- ▶ Line status test: ST206 can determine the open or short circuit status.
- ▶ Voltage polarity detection: ST206 can test the positive and negative of DC voltage in the line.

SPECIFICATIONS:

	Tone Generator	Tone Probe
Control	- SCAN/ OFF/ TEST switch - Function switch over touch button	- Press to test switch - Volume rotary switch - Flash light switch
Indicators	- Status: solid/ flash red LED - Polarity: +(red)/-(green) LED - LAN: 1-8 green LED	- Signal audio speaker - Signal LED - LAN: 1-8 green LED
Output	- Alligator clips test lead - RJ-11 test lead - RJ-45 jack	- RJ-45 jack - Earphone jack
DC Voltage Test Range	- 3 to 30 VDC	- N/A
Battery	- 1x9V	- 1x9V
Dimension	- 24x42x135mm	- 26x36x177mm
Weight	- 145g	
Standard Package	- ST206 (Generator) - ST206 (Probe) - Earphone - 2x9V battery - user manual - carrying case
